

Add ReactiveFormsModule to your AppModule

Section 11, Lecture 112

As the title says: Make sure to add the ReactiveFormsModule to your AppModule to avoid any errors when working with data-driven (= reactive) forms.

```
1. ...
2. import { ReactiveFormsModule } from '@angular/forms';
3.
4. @NgModule({
5.   declarations: [...],
6.   imports:      [BrowserModule, ReactiveFormsModule],
7.   bootstrap:    [...],
8. })
9. export class AppModule {}
10.
```
