

Add FormsModule to your AppModule

Section 11, Lecture 99

As the title says: Make sure to add the FormsModule to your AppModule to avoid any errors when working with template-driven forms.

```
1. ...
2. import { FormsModule } from '@angular/forms';
3.
4. @NgModule({
5.   declarations: [...],
6.   imports:      [BrowserModule, FormsModule],
7.   bootstrap:    [...],
8. })
9. export class AppModule {}
10.
```
